

INDEPENDENT LIMITED ASSURANCE STATEMENT

To the Stakeholders of Howmet Aerospace Inc.

Introduction and objectives of work

Bureau Veritas UK Ltd. ('Bureau Veritas') has been engaged by Howmet Aerospace Inc. ('Howmet') to provide limited assurance over their Scope 1 and 2 greenhouse gas (GHG) emissions data for the period 1st January to the 31st December 2021. This Assurance Statement applies to the related information included within the scope of work described below.

Scope of work

The scope of our work was limited to assurance over the following data for the period 1st January to the 31st December 2021 (the 'Selected Information'):

1. Scope 1 GHG emissions
2. Scope 2 GHG emissions – Location-based

Reporting criteria

The Selected Information has been prepared in accordance with Howmet's internal reporting methodology document, "Greenhouse Gas Calculations and Inventory Preparation (April 2022)", that was prepared inline with the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard (revised edition).

Limitations and Exclusions

Excluded from the scope of our work is any verification of information relating to:

- Activities outside the defined verification period;
- Positional statements (expressions of opinion, belief, aim or future intention by Howmet) and statements of future commitment.

This limited assurance engagement relies on a risk based selected sample of sustainability data and the associated limitations that this entails. The reliability of the reported data is dependent on the accuracy of metering and other production measurement arrangements employed at site level, not addressed as part of this assurance.

This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist.

Responsibilities

This preparation and presentation of the Selected Information in the Report are the sole responsibility of the management of Howmet. Bureau Veritas was not involved in the drafting of the Selected Information or of the Reporting Criteria. Our responsibilities were to:

- obtain limited assurance about whether the Selected Information has been prepared in accordance with the Reporting Criteria;
- form an independent conclusion based on the assurance procedures performed and evidence obtained; and
- report our conclusions to the Directors of Howmet.

Assessment Standard

We performed our work in accordance with International Standard on Assurance Engagements (ISAE) 3000 Revised, Assurance Engagements Other than Audits or Reviews of Historical Financial Information (effective for assurance reports dated on or after December 15, 2015), issued by the International Auditing and Assurance Standards Board.

Our conclusions are for 'limited' assurance as set out in ISAE 3000.

Summary of work performed

As part of our independent verification, we undertook the following activities remotely:

- Conducting interviews with relevant personnel at Head Office responsible for compiling and reporting the Selected Information;

- Reviewing the data collection and consolidation processes used to compile Selected Information, including assessing assumptions made, and the data scope and reporting boundaries;

- Carrying out two remote site visits at the following locations:

- Monterey (Howmet Wheel Systems)
- Hampton (Howmet Engine Systems)

Sites were selected taking into account factors such as year-on-year variation in data, nature of operations and activities undertaken, geographic spread, and the materiality of these sites in relation to total energy use and GHG emissions.

- Agreeing a selection of the Selected Information to the corresponding source documentation on a sample basis for an additional three sites and other centrally collated data inputs;
- Reviewing documentary evidence provided by Howmet;
- Reviewing Howmet's systems for quantitative data aggregation and analysis;
- Reperforming a selection of aggregation calculations of the Selected Information

It should be noted that the scope of a limited assurance engagement is substantially less than for reasonable assurance both in terms of the risk assessment procedures and in performing the procedures to address the identified risks.

Conclusion

On the basis of our methodology and the activities described above nothing has come to our attention to indicate that the Selected Information is not fairly stated in all material respects. This conclusion is based on work undertaken and the limitations and exclusions defined in this statement.

Verified GHG Emissions	2021
Scope 1 emissions (MTCO _{2e})	368,412
Scope 2 emissions (MTCO _{2e}) – Location based	403,638

Statement of Independence, Integrity and Competence

Bureau Veritas is an independent professional services company that specialises in quality, environmental, health, safety and social accountability with over 190 years history. Its assurance team has extensive experience in conducting verification over environmental, social, ethical and health and safety information, systems and processes.

Bureau Veritas operates a certified Quality Management System which complies with the requirements of ISO 9001:2015, and accordingly maintains a comprehensive system of quality control including documented policies and procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Bureau Veritas has implemented and applies a Code of Ethics, which meets the requirements of the International Federation of Inspections Agencies (IFIA), across the business to ensure that its employees maintain integrity, objectivity, professional competence and due care, confidentiality, professional behaviour and high ethical standards in their day-to-day business activities. The assurance team for this work does not have any involvement in any other Bureau Veritas projects with Howmet.
