

Approved Supplier List (ASL-19) July 2023 ASL-19

The attached Approved Supplier List 19 (ASL-19) and Supplier Process Summary Sheets reflect HFS' Approved Suppliers who can perform work or who supply products and services to HFS as defined in HFS Policies and Procedures. This list supersedes all prior releases of the ASL-19. Please destroy/obsolete any such list in your possession.

The ASL-19 and the Procurement Oracle EBS systems are not directly linked. The ASL-19 is the database for Approved Suppliers who can perform work or services to HFS deliverable products. Suppliers who provide the products or services that are not incorporated in HFS deliverable products may not be listed on the ASL-19 but listed in the Oracle EBS system.

Prior to Purchase Order placement, each HFS site must review the ASL-19 to ensure the supplier is approved for the specific work, process or service required. Requirements for adding new suppliers can be found in the Quality Assurance System Level 1 Document, Section 12.

Customer approvals (listed in the comments section) are to be used as a general guideline when needing to procure services from customer approved sources. HFS sites should always ensure the ASL-19 approved source is current on the customers' approval supplier listing.

Billing addresses will not usually be listed in the ASL-19. When applicable, references to billing addresses can be found in the comments section.

If you are aware of any error found in the ASL-19, such as a change in supplier location, please notify Supply Chain Management so the appropriate updates can be made.
